

Abdullah Al Masud

Senior Mobile App Developer | Android, Flutter & KMP/CMP

📞 01737606053 | ✉ dev.almasud@gmail.com | 🌐 abdullah-almasud | 🐙 almasud
📍 Flat-2B, House-59/60, Road-8, Block-C, Section-6, Mirpur, Dhaka-1216

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience specializing in native Android, Flutter, and Kotlin Multiplatform (KMP/CMP) mobile application development. Proven expertise in building high-performance, scalable mobile applications using clean architecture principles. Skilled in REST API, MQTT, gRPC, GraphQL and WebRTC integrations, with additional experience in backend development using Laravel.

TECHNICAL SKILLS

Languages: Java, Kotlin, Dart, Python, JavaScript, PHP, SQL, XML, HTML5, CSS3
Android: Android SDK, Jetpack Compose, Hilt, Coroutines, Flow, RxJava, Retrofit, Room Database, Google Maps
Flutter: Bloc, GetIt, GoRouter, Dio, Freezed, json_serializable, Dart Streams, Material Design
KMP/CMP: Kotlin Coroutines & Flow, Ktor, Koin, Kotlinx Serialization, Compose Multiplatform
Architecture & Patterns: Clean Architecture, MVVM, MVC, Bloc Pattern, Dependency Injection
API & Communication: REST API, MQTT, gRPC (Protocol Buffers), GraphQL, and WebRTC
Web & Backend: Laravel, Bootstrap, HTML5, CSS3
Tools & Platforms: Android Studio, VS Code, Xcode, Git, Postman, Jira, Firebase, Fastlane
Databases: MySQL, SQLite, Firebase Realtime Database, Cloud Firestore
Operating Systems: MacOS, Windows, Android, Ubuntu

PROFESSIONAL EXPERIENCE

Senior Software Engineer

NybSys Inc.

2021 – Present

Dhaka, Bangladesh

- Architect and develop enterprise-grade Android, Flutter, and KMP/CMP applications utilizing clean architecture and SOLID principles
- Building a Kotlin Multiplatform (KMP/CMP) mobile app for DataNet — a NybSys sister company operating in Eswatini, Lesotho and South Africa — targeting Android & iOS with shared business logic
- Integrated REST API, MQTT (Connect to IoT devices), gRPC (Protocol Buffers), GraphQL, and WebRTC communication layers across multiple projects
- Implemented CI/CD pipelines using Fastlane for automated app distribution to Firebase App Distribution and Google Play Store
- Lead cross-functional Agile teams in delivering large-scale mobile projects on schedule
- Implement modern development practices including Jetpack Compose, Hilt and Koin as dependency injection, reactive programming with Kotlin Coroutines, Flow, RxJava and Dart Streams
- Conduct code reviews and mentor junior developers on best practices and design patterns
- Optimize application performance resulting in improved user experience and reduced crash rates

Mobile Application Engineer

XOR Geek

2020 – 2021

Dhaka, Bangladesh

- Developed cross-platform mobile applications using Flutter and native Android frameworks
- Built and maintained RESTful APIs and admin panels using Laravel and PHP for mobile app backends
- Integrated third-party services including payment gateways, maps, and analytics platforms
- Collaborated with QA teams to ensure thorough testing and bug-free releases
- Participated in full software development lifecycle from requirement analysis to deployment

KEY PROJECTS

CDAS Employee App | KMP/CMP · DataNet / NybSys

- Developing a Kotlin Multiplatform (KMP) and Compose Multiplatform (CMP) mobile application for DataNet's Central Deduction Administration System (CDAS), serving government and financial sectors across Eswatini (formerly Swaziland), Lesotho and South Africa
- MVP features: user login, deduction (loan) request submission, loan history, application status tracking, and user profile — targeting both Android & iOS with shared business logic and UI layer

- **Technologies:** Kotlin, KMP, CMP, Compose Multiplatform, Coroutines, Flow, Ktor, Koin, Kotlinx Serialization, REST API, Fastlane

Xtreme VPN | *Security & Privacy Application*

- Developed a secure VPN application for Android providing encrypted internet connectivity and online privacy protection
- **Technologies:** Java, Kotlin, REST API, OpenVPN protocol, Fastlane

Sentra PTT | *Voice & Data Communication Platform*

- Developed a comprehensive push-to-talk communication application featuring AI-powered collaboration tools, real-time messaging, location sharing, and rich media capabilities for enhanced team coordination
- **Technologies:** Android, Java, Kotlin, MQTT, gRPC(Protocol Buffers), Retrofit, Room Database, WebRTC, Fastlane

DrinkWell | *Clean Water Management System*

- Created two Flutter-based mobile applications for managing water ATM operations and dealer-operator transactions
- **Pump Operator App:** User registration, NFC card management, balance recharging, daily report generation
- **Dealer App:** Fund transfers, transaction tracking, operator management, financial reporting
- **Technologies:** Flutter, Dart, REST API, NFC tag reader, SQLite

Hokkaido Golf Club App | *Members-Only Golf Club Management*

- Designed and developed an Android application for exclusive golf club member access and facility management
- **Technologies:** Android, Java, Retrofit, Material Design

One-Click Order | *Wholesaler's Order Management App & Backend*

- Built a complete e-commerce solution including Android/iOS mobile app and a Laravel-based backend REST API with admin dashboard for authentication, product management and order processing
- **Technologies:** Flutter, Dart, Laravel, Bootstrap, PHP, MySQL, REST API

Augmented Learn | *Educational AR Application*

- Created an innovative educational app using augmented reality to enhance preschool learning experiences
- **Technologies:** Java, RxJava, Retrofit, ARCore, 3D modeling (Blender), Adobe Photoshop

EDUCATION

Dhaka International University
Bachelor of Science in Computer Science & Engineering

Dhaka, Bangladesh
 2015 – 2019

ADDITIONAL INFORMATION

Languages: Bengali (Native), English (Professional Working Proficiency)

Interests: Building scalable mobile products, productivity-focused UI/UX, and exploring AI-driven and cross-platform technologies
